

# digiTICKET<sup>™</sup>

## Are you ready to do more with less?

**digiTICKET is Anyware's straight forward solution to electronic ticketing!** Anyware's packaged solution for public safety allows your department to eliminate the tedious and wasteful process of hand-writing tickets and re-entering the ticket data into a backend Record Management System.

No more quadruplicate paper tickets, no more data entry delays and no more lost tickets. By eliminating lost tickets and reducing the amount of time required during traffic stops, your department can save money, recognize previously lost revenues and increase the safety of your officers. With Anyware's easy to use, affordable electronic ticketing system your department can do more with less.

## Benefits of Anyware's Electronic Ticketing Including:

### Dramatically reduce time required to issue tickets

- Automatically enter data from drivers license bar code scan
- Issue multiple violations - no re-entering driver data
- Improve officer safety

### Decrease cost of managing tickets

- No more manual data entry
- Improved cash flow - reduce time to process tickets from days to minutes

### Recapture lost revenue

- Significantly decrease number of lost or unusable tickets
- Increase the number of tickets issued

digiTICKET captures all driver information, citation data and the defendant's signature electronically on a mobile computer, prints out a paper receipt for the defendant and then sends the data directly to your back-office Record Management System (RMS) with little or no human intervention. What are you waiting for?

**Break away and take your productivity wireless. Let Anyware help you cut the cord.**
